sofengkhizar.vercel.app

Professional Summary

Software Engineer (MERN & DevOps) with hands-on freelance and internship experience in developing scalable full-stack web and desktop applications. Skilled in React.js, Node.js, Express.js, MongoDB, Electron.js, RESTful APIs, application deployment, and SaaS development. Passionate about building performant, user-focused, and production-ready software solutions.

Education

■ Intermediate of Computer Science (ICS)

National Science
College 2020-2022

■ Associate Degree Program in Computer Science (ADP-CS)

Superior Group of Colleges
2024-2026

Work Experience

MERN Stack Developer

Mindspire Software House (June 2025- Jan 2026)

- Developed and maintained MERN stack applications during a 6-month internship
- Built and optimized RESTful APIs for improved performance
- Debugged and resolved real-world application issues
- Collaborated on UI improvements to enhance user experience

Freelancing Experience

2025-Present

- Built multiple full-stack web applications using MERN stack
- Developed desktop applications using Electron.js
- Implemented RESTful APIs and authentication systems (JWT)
- Practiced real-world problem solving through hands-on projects

Technical Skills

- Frontend: React.js, Tailwind CSS
- Backend: Node.js, Express.js
- Database: MongoDB
- Full-Stack Development (MERN Stack)
- RESTful API Development & Integration
- Authentication (JWT)
- Application Deployment
- Desktop Application Development (Electron.js)
- DevOps

Core Skills

- Problem Solving
- Debugging
- Technical Research
- Responsive UI/UX Design
- System Troubleshooting

Tools and Technologies

- Git & GitHub
- VS Code
- AI Development Tools (Cursor, Windsurf, Claude)
- VPS Hosting
- Vercel
- Postman

Projects

Business & Portfolio Websites

Butt Foods - Restaurant Website

- Developed a responsive restaurant website using the MERN Stack.
- Designed a modern UI with Tailwind CSS.
- Implemented contact and inquiry system using NodeMailer.
- Built secure RESTful APIs and optimized application performance.

Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, NodeMailer

Aurelia - Hotel Booking Website

- Developed a full-stack hotel booking platform.
- Built booking management features and secure backend APIs.
- Implemented email functionality using NodeMailer.
- Designed a responsive and user-friendly interface.

Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, NodeMailer

The Forge - Gym Website

- Developed a modern and responsive gym website.
- Built dynamic frontend components and backend APIs.
- Focused on performance, scalability, and user experience.

Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS

SaaS & Enterprise Applications

Tabify – Café Management Desktop Software

- Developed a desktop café management system using Electron.js.
- Built modules for order management, billing, and inventory.
- Integrated backend APIs for seamless data synchronization.

Tech Stack: MongoDB, Express.js, React.js, Node.js, Electron.js

FixItNow – Multi-Service Marketplace Platform

- Independently designed and developed the complete platform from scratch.
- Built separate Customer Application and Admin Panel.
- Developed scalable RESTful APIs and secure JWT authentication.
- Implemented real-time communication using WebSockets.
- Built live updates, instant synchronization, and push notification system.
- Integrated Resend Mail for authentication and transactional emails.
- Managed deployment, VPS hosting, and production infrastructure.
- Optimized backend performance and database operations for scalability.
- Designed a scalable architecture supporting separate customer and admin applications with real-time synchronization.

Tech Stack: MongoDB, Express.js, React.js, Node.js, WebSockets, Resend Mail, JWT Authentication, Tailwind CSS, RESTful APIs, VPS Deployment

Achievements

- Built 5+ production-ready applications.
- Developed enterprise-level SaaS platforms independently.
- Experienced with real-time systems using WebSockets.
